## EXPERIENCE

### Android Developer Intern

#### ADP Canada Co - Work Market Inc

📅 Jan 2018 – April 2018

📍 Toronto, Ontario

- Used Java and Kotlin to develop for Work Market's Android application, which involves implementing new features, debugging and writing unit tests using the JUnit testing framework
- Worked with a team of experienced mobile developers on building and adding to a published native mobile application
- Ensured that business requirements and functional specifications are tested and fulfilled before the code is delivered for integration
- Worked with a disciplined software release, build, and deploy processes

### Quality Engineer Intern

#### ADP Canada Co - Work Market Inc

📅 May 2017 – Aug 2017

📍 Toronto, Ontario

- Performed manual testing of new features and API testing using Postman and Charles
- Utilized written and verbal communication skills in reporting bugs and recording test cases
- Wrote automated UI tests for Android using Espresso

## RELEVANT PROJECT

### OutfitPicker

#### Android mobile app

📅 Hack the Valley 2, 2018

🐙 github.com/Nataland/OutfitPicker

- A team project
- How it works: users simply upload pictures of items in their closet, this app will generate outfits based on these images
- Utilizes Microsoft Azure's Computer Vision API to recognize items in uploaded pictures
- Uses a unique algorithm to determine which clothing and accessory items to match together and generate suggestions

## REFEREES

### Greg Burgoon

@ Work Market Inc

✉ greg@workmarket.com

129 Spadina Avenue
